

Haneet Singh Chhabra

Senior Software Engineer (Android) | E2E Technical Lead

Bengaluru, India | haneetatwork@gmail.com | linkedin.com/in/haneetchhabra | haneetgh.github.io

10+ Years | Kotlin · Jetpack Compose · Next.js · GenAI · GCP · GraphQL

PROFESSIONAL SUMMARY

Senior Android engineer, 10+ years, currently at Walmart Global Tech (Reviews & UGC, Shopping App). Owns features end-to-end: PM discovery, stakeholder alignment, architecture, hands-on development, and backend/API when needed. Also ships full-stack products with Next.js, serverless data, AI pipelines, and payments (Swaneet, Billsplit). Billion-request-scale performance wins, multiple Bravo Awards; 7 prior years at Rakuten, IoT, and startups.

KEY IMPACT

74% Faster reviews UI on highest-traffic product pages	1.6B+ Backend API calls eliminated per day	8+ Senior stakeholders briefed on architecture decisions	5 teams Coordinated for system design and delivery
--	--	--	--

EXPERIENCE

Senior Software Engineer - Android
Walmart Global Tech · Shopping App · Reviews & User-Generated Content

Feb 2023 - Present

PRODUCT & STAKEHOLDERS

- Partner with PM on epic discovery, feasibility, sprint scoping, and A/B experiments with clear success metrics.
- Briefed 8+ senior stakeholders on architecture tradeoffs, caching strategy, and platform decisions with written analysis.
- Aligned iOS, web, backend, search, data science, and vendor (Bazaarvoice) on APIs, camera flows, and rollout.
- Self-initiated video reviews from discovery through PoC; resolved Creator vs Reviewer Program gap via cross-team API design.

ENGINEERING & PERFORMANCE

- Reviews UI on item detail page: render time **380ms to 96ms**, CPU **-72%**, dropped frames **-73%**, jank eliminated on highest-traffic screens.
- Variant reviews caching: reduced **1-1.6B API calls/day**, ~21% latency improvement, zero business impact.
- Migrated reviews to standalone module (zero regressions); parallel dashboard loading with graceful degradation.
- Shipped camera upload, multi-image selection, and reviewer community; owned PM discovery through iOS/web alignment.
- Video reviews E2E: vendor API research, multipart upload, metadata extraction, PoC, and sprint delivery plan.
- GenAI image search prototype with data science and search teams; on-device model integration under 2s latency.
- GraphQL orchestration, OpenAPI clients, Redis caching (~85% projected peak load cut); surfaced cross-team API blocker early.

QUALITY & LEADERSHIP

- Built PixelMind (visual regression testing) and release sign-off SOP - adopted as team standards.
- 48+ consecutive** stable CI runs; led incident response when automation dropped to ~48%; mentor 2-3 engineers.

Multiple-time Bravo Award | Zero accessibility defects

EARLIER EXPERIENCE

2014-2023: enterprise messaging, IoT, and startup product engineering.

Senior Software Engineer II - Android
Rakuten India
2021 - 2023

- Scaled Rakuten LINK consumer and enterprise apps: chat, messaging, offline sync, and database optimization.

Senior Android Engineer
WHIDE / Letstrack
2019 - 2021

- Built IoT tracking apps end-to-end: real-time location, background services, and offline-first architecture.

Android Developer
Praesidium, Softuvo, Bytenomi, TechITechnologies
2014 - 2019

- Praesidium: owned service and payment apps from architecture through release.
- Startup roles: consumer apps, internal tools, and mobile fundamentals.

SELECTED PROJECTS

#Swaneet Wedding Platform
Next.js 15 / Neon / Rekognition
[Live](#) · [GitHub](#)

- Cinematic wedding site + PIN/RBAC admin: RSVP, stays, gallery moderation, multi-site feature flags; Neon + Vercel Blob + Resend.
- AWS Rekognition face find (selfie match, cluster merge, magic-link albums); Framer Motion, GSAP, React Three Fiber.

Billsplit India
Turborepo / Firebase / Razorpay
[GitHub](#)

- Fintech MVP: OCR + LLM receipt parsing, equal/item splits, secure claim links, UPI via Razorpay (no wallet float; paise integers).
- Webhook HMAC settlement, admin feature flags/entitlements, Firestore rules; monorepo packages ready for React Native.

TECHNICAL SKILLS

Android: Kotlin, Java, Android SDK, Jetpack Compose, MVVM, Coroutines, Flow, Room, CameraX, WorkManager, RecyclerView, Performance Engineering, Module Architecture

Full-Stack: TypeScript, Next.js, React, Tailwind, Zod, TanStack Query, Turborepo, Framer Motion/GSAP, Vercel, Neon Postgres, Vercel Blob

AI, Cloud & Payments: GenAI/LLM (Gemini/OpenAI), AWS Rekognition, OCR (Tesseract/Vision), Vector Search, on-device ML, GCP, Firebase, Razorpay/UPI, webhook HMAC, Presigned URLs, CDN

Leadership & Quality: E2E Ownership, Product Discovery, Stakeholder Management, Technical Design, RBAC/Feature Flags, Mentorship, GraphQL, Redis, Kafka, CI, GitHub Actions, Vitest/Playwright, Visual Regression, Accessibility (ADA)

EDUCATION

B.Tech, Computer Science & Engineering
Punjab Technical University
