Haneet Singh Chhabra

Senior Software Engineer | Android, Platform & Data

Bengaluru, India | haneetatwork@gmail.com | linkedin.com/in/haneetchhabra | haneetgh.github.io

10+ Years | Kotlin · Jetpack Compose · GraphQL · Spark/Kafka · Next.js · GenAI

PROFESSIONAL SUMMARY

Senior Software Engineer at Walmart Global Tech building the UGC (reviews, ratings, media) platform. Works across Android (Kotlin), GraphQL/Node.js, Java services, and GCP data pipelines (Spark, Kafka, Airflow, BigQuery, Cassandra). Leads zero-downtime migrations, performance engineering, and AI-assisted tooling. Ships personal products: Gatheroly (event SaaS), Swaneet (wedding platform), BillSplit (fintech). Multiple Bravo Awards.

KEY IMPACT

~75%	3.3M	~40%	11
Faster Reviews UI on highest-traffic pages	Req/min stress capacity; p95 ~49 ms	Lower seller-reviews p95 via item cache	Surfaces under dual read/write + flags

EXPERIENCE

Senior Software Engineer

Feb 2023 - Present

Walmart Global Tech · UGC (Reviews, Ratings, Media) · Android · GraphQL · Java · GCP

PLATFORM, MIGRATION & ARCHITECTURE

- Led zero-downtime V1→V2 dual read/write migration with feature-flagged shadow traffic, parity logging, and instant rollback across **11 surfaces** (1,251/1,251 tests; 30 new); now in A/B.
- Designed Memcache cache-aside for item enrichment: seller-reviews p95 ~**40% lower**; projected **80–95%** fewer repeat downstream calls; 8-option enrichment analysis (est. 8K → 0.4–1.6K QPS).
- Built OpenAPI clients and GraphQL resolvers (seller reviews, submit, sampling) forming the UGC 2.0 foundation; led enrichment design with 5+ platform teams.

MOBILE, MEDIA & PERFORMANCE

- PDP Reviews render ~**40→10 ms** (~75% faster), jank near zero; earlier variant caching cut **1–1.6B API calls/day**.
- Led Video Reviews research→production: vendor API deep-dive, progressive upload, Android streaming (64 KB chunks, up to 200 MB); camera + multi-image aligned across Android/iOS/web.
- Capacity/stress at ~**3.3M req/min**: p95 ~49 ms (from 121–145 ms), 0 rate-limits; found Node single-thread ceiling and slow downstream call.

DATA PIPELINES, QUALITY & LEADERSHIP

- Built multi-channel (email/push) sampling reminder pipeline: Spark/Dataproc, Airflow, Kafka (protobuf/SSL), Cassandra, BigQuery — targeting ~33K never-enrolled invitees; A/B gating + safe E2E harness.
- Built PixelMind (DINOv2 visual regression on K8s); ~30–35% fewer UI-automation false failures; release sign-off SOP; AI tooling (status skill, flag generator).
- Caught pre-prod risks (vendor double-write, OOM, false canary rollback, secrets); on-call, stress ownership; mentor engineers.

Multiple-time Bravo Award | Zero accessibility defects

EARLIER EXPERIENCE

2014–2023: enterprise messaging, IoT, and startup product engineering.

Senior Software Engineer II - Android
Rakuten India
2021 - 2023

- Scaled Rakuten LINK consumer and enterprise apps: chat, messaging, offline sync, and database optimization.

Senior Android Engineer
WHIDE / Letstrack
2019 - 2021

- Built IoT tracking apps end-to-end: real-time location, background services, and offline-first architecture.

Android Developer
Praesidium, Softuvo, Bytenomi, TechiTechnologies
2014 - 2019

- Praesidium: owned service and payment apps from architecture through release; earlier startups: consumer apps and tools.

SELECTED PROJECTS

Gatheroly
Next.js / Prisma / Neon
gatheroly.tech

- Multi-tenant event SaaS: owner/vendor/client roles, subdomain tenants, RSVP/stay/Connect, Rekognition face-find, trials & entitlements; API-first for future mobile.

#Swaneet Wedding Platform
Next.js 15 / Neon / Rekognition
Live · GitHub

- Cinematic wedding site + PIN/RBAC admin (RSVP, stays, gallery, multi-site flags); face find + Resend; Framer/GSAP/R3F.

BillSplit India
Turborepo / Firebase / Razorpay
GitHub

- Fintech MVP: OCR+LLM receipts, UPI via Razorpay (no wallet float), webhook HMAC, monorepo ready for React Native.

TECHNICAL SKILLS

Android: Kotlin, Java, Jetpack Compose, MVVM, Coroutines/Flow, CameraX, streaming multipart upload, performance, module architecture

Platform & Data: GraphQL, Node.js/TypeScript, OpenAPI, Spring/Java, Memcache, Spark, Airflow, Kafka, Cassandra, BigQuery, Kubernetes, feature flags, A/B

Product & AI: Next.js, Prisma, Neon, Firebase, Vercel, Rekognition, DINOv2/visual regression, GenAI/LLM, OCR, Razorpay/UPI

Leadership: E2E ownership, technical design, cross-team delivery, release engineering, load/stress testing, mentorship

EDUCATION

B.Tech, Computer Science & Engineering
Punjab Technical University
